DUAL RESISTOR SD

Dual Resistor SD precisely and reliably provides 1 to 10 megohms of electrical resistance (SD 10), meeting the latest ASTM F2413-18 standard, updated 2018. With Dual Resistor SD not only do you get assurance that your footwear will consistently pass the SD 10 level, but with two resistors you can be confident that it will pass time and time again.*

- Meets SD 10, the latest ASTM F2413-18 standard, updated 2018
- Precisely provides 1 to 10 megohms of electrical resistance
- Features a fail-safe system for consistent and reliable SD 10 performance
- Patented technology (US Patent 6,421,222)

* The static dissipative performance of SD footwear may vary depending on environmental conditions of the complete system of footwear, which includes clothing, foot moisture, and items put in the footwear (e.g. foot powder, insoles, etc.). These conditions may adversely affect SD performance.

RB4039/RB039 SUBLITE CUSHION WORK

RB4036 SUBLITE CUSHION WORK

AVAILABLE IN 30+ STYLES. See pgs 70 & 71

11, 12, 13, 14, 15, 16

MemoryTech Massage footbeds form to the unique contours of your feet for immediate comfort and lasting cushioning. Profiled bumps soothe tight muscles with every step for a treat your feet will thank you for. MemoryTech footbeds are removable and machine washable for durability and longevity. Featured in the SubLite Cushion Work, DMX Flex Work, and ZPrint Work.

CUSHGUARD™

MET GUARD PROTECTION. SURPRISING COMFORT.

A COMFORT-FIRST SHOE, THE SUBLITE CUSHION WORK WITH CUSHGUARD™ CONCEALS A METATARSAL GUARD. CUSHGUARD™ FLEXES AND BENDS WITH EASE, SO YOU WON'T NOTICE IT WHILE WALKING, BUT CUSHGUARD'S™ EVA FOAM PROVIDES MET-GUARD IMPACT PROTECTION AGAINST FALLING OBJECTS.

- Multi-Directional Flex
- Ultra-Light, Ultra-Comfortable
- Met-Guard protection
- Thin profile for increased comfort

FEATURES & BENEFITS ICONS

ASTM F2413 is the official standard for safety footwear in the United States.

ASTM F2892 is the new official standard for soft toe protective footwear in the United States. (Non-Safety/Non-Protective Toe)

Composite Toe—A toe cap made from a non-ferrous elastomeric material, which is light weight and will not conduct heat, cold or electricity. Composite toes meet or exceed the ASTM F2413 Standard for protective footwear.

Steel Toe—Non-corrosive toe caps used in footwear to provide protection for the toe area. Steel Toes meet or exceed the ASTM F2413 Standard for protective footwear.

Soft Toe — Non-protective toe cap.

XTR® Brand Composite Toe Cap—The XTR® Brand composite toe cap provides extra toe room and comfort; is lightweight, strong as steel and will not conduct heat, cold or electricity. This XTR® Brand composite toe cap meets or exceeds the ASTM F2413 standard for protective footwear.

Static Dissipating with Dual Resistor—Static Dissipative footwear dissipates static electricity from the wearer's body into the walking surface to prevent static electricity build-up. It also provides some electrical resistance and offers limited protection to the wearer against electrical shock. Dual Resistor SD is a Warson Brands patented technology (US Patent 6,421,222) that precisely and reliably provides 1 to 10 megohms of electrical resistance, ensuring that the footwear meets the SD 10 standard. These shoes are to be used in areas where the generation of static electricity could harm electrical equipment, circuit board assembly, the manufacture of computer chips, or paint application processes.

Electrical Hazard safety footwear provides workers a secondary source of protection from live circuits, wires or highly charged electrical equipment. The insulating properties of such footwear are measured under dry conditions and may deteriorate in wet environments and with wear.

Conductive—Safety footwear used in areas with highly volatile and explosive materials.

Metatarsal Guard—An appliance added to footwear, designed to provide additional protection to the instep area. Traditionally used in areas where there is a higher risk of objects falling or rolling onto the instep of the worker's foot.

Flex-Met™—An anatomically shaped flexible metatarsal guard with shock cushion permanently Footbedded inside the instep area of the shoe upper.

Puncture Resistant—A patented non-metallic insole material is permanently affixed inside the shoe to retard the penetration of certain objects through the bottom of the sole of the shoe. Meets or exceeds the ASTM F2413 Standard for Puncture Resistance.

Slip Resistant—Soles designed to provide a higher level of coefficient of friction with the walking surface to improve slip resistance.

Airport Friendly—While this Reebok footwear contains some metal hardware, it will not activate most airport metal scanning devices.

Metal Free—This Reebok footwear is metal free. It is ideal for jobs that require working around sensitive metal detectors.

Insulated—Thinsulate™ insulation material added to the lining in boots to help keep the foot warm and comfortable in colder environments.

Waterproof—A combination of water resistant materials and construction which helps protect the foot from getting wet in environments where excess water is present.

Total Cushioning Technology™ provides five layers (1-1/2") of cushioning under the heel and three layers (1/2") under the forepart: deeper, total cushioning for amazing comfort and impact protection.

The Foot Force® F2A Athletic Insole is a soft molded dual density polyurethane removable insole that cushions and cradles your foot, provides additional shock absorbing polyurethane ball and heel pads and a moisture absorbing fabric covering.

The FootFuel® Insole is a footbed technology engineered to deliver higher levels of control, comfort and energy return. Developed for high performance footwear, FootFuel™ responds on impact, absorbing shock and supporting your foot. On lift off, FootFuel™ polymers expand launching your foot with every step. FootFuel™ retains its cushioning and rebound properties for the life of the shoe - so you never run out of fuel. With just the right amount of cushioning, FootFuel™ provides both comfort and stability for a unique fit and explosive performance.

TAA Compliant

Manufactured in a country listed in the Trade Agreements Act. GSA schedule compliant.

Quick-Access Side Zipper offers the convenience of a slip-on shoe in a 6"-8" military boot.

In / out: 5 seconds per boot! Does not bind up in sand.

Aircor™ Athletic Air Comfort Technology - located inside the heel offers unmatched impact resistance and walking comfort.

XTR® Brand Alloy Toe Cap—The XTR® Brand alloy toe cap contains a specialized blend of metals to minimize weight and maximize protection. The alloy blend allows for a sleek appearance while providing extra room in the toe box. The XTR® alloy toe cap is lighter than steel, while still meeting or exceeding the ASTM F2413 standard for protective footwear.

XTR® Brand Carbon Toe Cap—The XTR® Brand carbon toe cap contains a specialized blend of carbon and composite materials to reduce weight and maximize toe room for increased comfort. The XTR® carbon toe cap is lightweight, and will not conduct heat, cold, or electricity. The XTR® carbon toe cap meets or exceeds the ASTM F2413 standard for protective footwear.

Canadian Features and Benefits Icons

CSA Impact—Reebok footwear is manufactured to meet or exceed CSA Grade 1 Protective Toe. A blue rectangle indicates Grade 1 protective toe without puncture protection. Grade 1 protective toe withstands impacts of 125 Joules and maintains standard minimum clearances depending on the shoe size. Comparable to a 22.7 kg (50 lb) weight dropped from a distance of 0.6 m (23.6 in).

Electrical Shock Resistance—Reebok footwear is manufactured to meet or exceed CSA Grade 1 Protective Toe for Electrical Shock Resistance. Its purpose is to certify that the footwear contains a sole and heel design assembly that, at the point of manufacturing, has electrical insulating properties intending to withstand 18,000 volts with a leakage current not exceeding 1mA. This is for any industry where accidental contact with live electrical conductors can occur.

WARNING: Electrical Shock Resistance deteriorates with wear and in wet environments.

Puncture Protection—Reebok footwear is manufactured to meet or exceed the CSA Grade 1 Protective Toe. A green triangle indicates sole puncture protection with a Grade 1 protective toe to withstand impacts of 125 Joules. Comparable to a 22.7 kg (50 lb) weight dropped from a distance of 0.6 m (23.6 in). Sole puncture protection is designed to withstand a force of not less than 1200 Newtons (270 ft lb) and resists cracking after being subjected to 1.5 million flexes. For any industry, especially construction and heavy work environments, where sharp objects, such as nails are present.

Static Dissipative—Yellow rectangle with a green "SD" and grounding symbol indicates soles are static dissipative. The outer soles are made from an antistatic compound, chemically bound into the bottom of the components, capable of dissipating an electrostatic charge in a controlled manner. The test criteria are 106 to 108 Ohms. Note that SD footwear without toe protection will not have sole protection certified by CSA.

ABOUT US

Warson Brands* offers a portfolio of six national brands and over 200 styles of safety footwear for men and women. We have been in the occupational footwear manufacturing business since 1988. We design and engineer footwear for nearly every occupation on the planet. With us, designing and crafting occupational and duty uniform footwear isn't just a sideline, it's our passion, our one and only business.

OUR MISSION: PERFORMANCE

Our business model is simple: the better our shoes perform, the better our customers perform – from our wholesale and retail customers to our end-users.

OUR GOAL:

Providing the best customer service, period. We sell occupational footwear all over the world. However, when it comes to customer service, we want to be right next door. Our customer service staff, with a combined experience of over 300 years, knows your business and works hard to earn it every day.
